

## MEDIA MONITORING OF VIOLENT INCIDENTS IN GHANA

### Supplementary Update

By: Foundation for Security and Development in Africa (FOSDA)

### Monthly Update-November 2025

A total of fifty-one (51) violent incidents were recorded across Ghana in November 2025. Of these, Physical violence accounted for 31 incidents (61%), while gun related incidents comprised 7 incidents (14%). There were 6 (12%) cases of Economic violence. There were 2 incidents of sexual and 1 case of social violence. Additionally, 4 cases representing 8% of the total cases were psychological forms of violence. There were no Political incidents recorded during the period.

Regionally, the Ashanti and Greater Accra Regions recorded the highest number of incidents, with 14 cases each, followed closely the Central Region with 7 cases. Eastern and Western North Regions also recorded 5 cases each. Similarly, Ahafo and Western Regions also recorded 2 cases each. There were 1 case each in Upper East, Bono Region, Volta and Oti Region. There were no cases in 5 regions including Savannah, Bono East, Northern Region, Upper East and Upper West Regions.

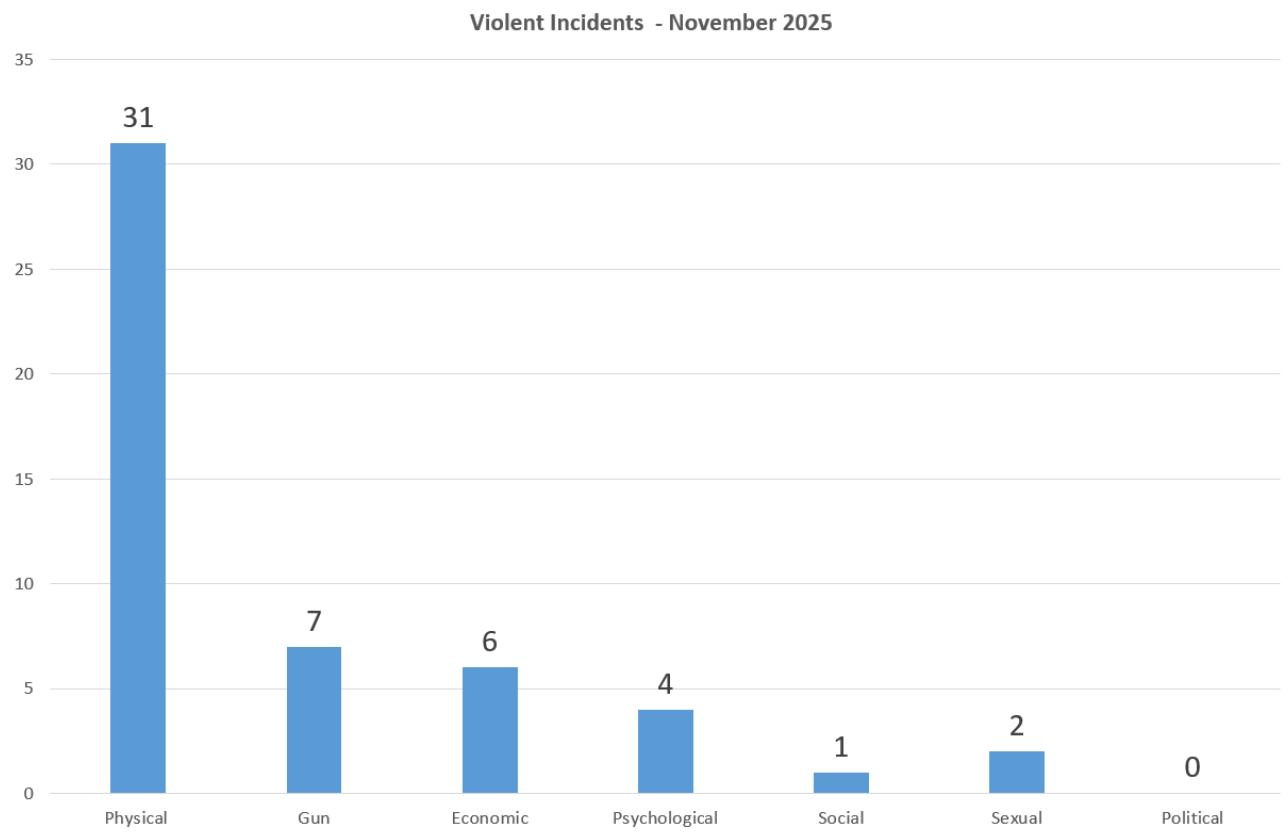

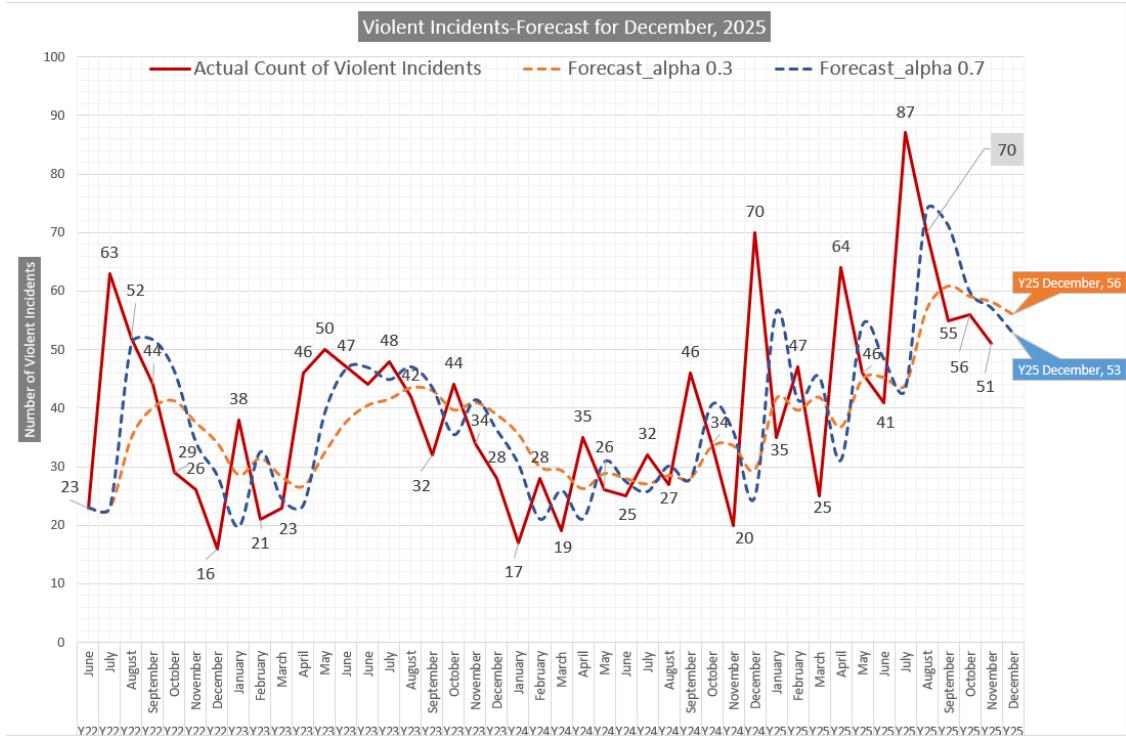

Figure 1: Violent Incidents for November 2025

The 51 violent incidents recorded in November 2025 falls below FOSDA's projected range of 57 to 58 incidents for the period. Therefore based on these 51 incidents in the November count, the projected incident count for December 2025 ending is estimated to range between 53 to 56 cases.

The incident count for the reporting period i.e 51 in addition to the 56 recorded in October bring to a total 107. This figure in comparison to the projected range (151 to 201) for the 4<sup>th</sup> qtr shows a great chance the lower limit may not be met considering the declining trends and the efforts being put in by the security actors for the 4<sup>th</sup> quarter respectively.

Fig. 3 The range of incidents predicted for the 4<sup>th</sup> quarter is between 151 to 201.
